PEDAL FOR THE PLANET
LINK UP WITH A US STUDENT

Since our last report when Jason and Steve arrived in Miami after pedalling across the Atlantic, they have now both arrived in San Francisco. Steve travelling on Roller Blades and Jason on his bike, a distance of 4300 miles!. On route they visited over thirty schools giving presentations about their adventure and describing life back here in the United Kingdom. Some of you may recall that Wembley High was one of the first schools they visited before leaving and that a number of Wembley High students attended the launch by the Duke of Gloucester of their boat in St. Catherine's Dock.

The Schools they visited in the United States have asked if there are any students who would like to link up with students over there. If anyone at Wembley High is interested in corresponding with an American student please telephone 0171 329 1711 and ask for 'Pedal The Planet'. Students in the US are waiting!
